PORTFOLIO
raful222.github.io/Portfolio

Core Skills

- C# & .NET 8–10
- ASP.NET Core / Web APIs
- Microservices Architecture
- Mainframe (MF) & Natural
- Redis Caching
- SQL Server & Query Optimization
- Angular & TypeScript
- JavaScript, Next.js & React
- Data Pipelines & Integrations
- Distributed Systems
- Docker & Containerization
- TFS / Azure DevOps & Git
- CI/CD & Agile
- Postman & Automated Testing
- AI-Assisted Development (Claude Code, Gemini, Codex)

Languages

Hebrew	Native
English	Fluent

REFAEL ROBINOV

SENIOR BACKEND & FULL STACK ENGINEER

Senior software engineer with production experience since 2021, specializing in C#, .NET, distributed systems, and enterprise integrations. Builds APIs, Redis caching layers, and data pipelines connecting Mainframe / Natural systems with .NET services and Angular applications. Independently builds and runs live products end to end, from backend to deployment.

Experience

Senior Backend & Full Stack Engineer — 2025 – Present
Israel Tax Authority (Sha'am)

- **Service Architecture:** Designed and deployed enterprise microservices and REST APIs using C#, .NET 8–10, and ASP.NET Core for national-scale systems.
- **Mainframe & Data Pipelines:** Developed and optimized Natural programs and pipelines feeding mainframe data into .NET services and Angular apps.
- **Caching & Performance:** Implemented Redis caching and optimized SQL queries to address processing bottlenecks and improve response times.
- **Frontend:** Built Angular and TypeScript portals and administrative dashboards integrated with backend APIs.
- **AI-Assisted Development & Quality:** Used Claude Code, Gemini, and Codex alongside automated code verification, TFS/Git CI/CD, and peer reviews.

Backend Developer — 2021 – 2025
Qualish Ltd, Omer

- **Backend Systems:** Developed C#/.NET 6 APIs, database schemas, and backend service endpoints.
- **Integrations:** Integrated multi-provider payment gateways, billing reconciliation, and real-time event notifications.
- **Data Visualization:** Built financial KPI dashboards and data pipelines for executive stakeholders.
- **Performance:** Streamlined customer onboarding workflows, reducing query latency and improving UX.

Selected Projects

StocksBattle – Real-Time Multiplayer Trading Game — stocksbattle.com
Stock and crypto trading game with live market data, multiplayer battles, and leaderboards; web app plus a native Android app on Google Play.
Next.js · React · TypeScript · Expo / React Native · CI/CD

TryInvest – Investment Portfolio & Israeli Tax Platform — tryinvest.co.il
Portfolio dashboard with Israeli capital-gains tax calculation, multi-provider market data including TASE pricing, and generated PDF tax reports.
C# · .NET · Angular · SQL Server · Docker

VBook – Animated Children's Books Platform — vbookapp.co.il
Live platform with server-side rendering, admin CMS, parent accounts, a book maker with AI narration and illustrations, and async ffmpeg video transcoding.
JavaScript · Vite · Node.js / Express · SQLite · Docker · ffmpeg · ElevenLabs API

Education & Professional Training

B.Sc. in Software Engineering – SCE, Be'er-Sheva — 2020 – 2023
GPA: **86.7** | Specialization in Cyber Security | Graduation project: anti-cheating exam management system (C#, Web API).

Automating Success & AI Certification – INT College — 2026
AI workflows, prompt engineering, and autonomous agent architectures.

Advanced Angular & .NET Training – John Bryce — 2025

Networking & Cyber Security Certification – Net4U College — 2019 – 2020

Military Service & Leadership

Combat Soldier & Commander – IDF Paratroopers — 2012 – 2015
First Sergeant. Led combat troops in high-pressure environments requiring rapid decision-making and resilience.

Youth Leadership Mentor – Aharai! (Impact Scholarships) — 2020 – 2023
Mentored youth from underserved communities in civic involvement and leadership.
