REFAEL ROBINOV

SENIOR BACKEND & FULL STACK ENGINEER — AI-AUGMENTED

Results-driven Senior Software Engineer with nearly 6 years of production experience architecting high-scale distributed systems, mission-critical Web APIs, and end-to-end enterprise architectures. Deep server-side specialization in C# and modern .NET (8–10), microservices, Redis caching, and core legacy Mainframe (MF/Natural) development, bridged with modern reactive client-facing applications in Angular (v17–21). Actively leverages advanced AI-assisted workflows (Claude Code, Gemini, Codex) to maximize development velocity, refactoring accuracy, and unit test coverage under national-scale workloads.

Core Skills

- C# & .NET 8–10
- ASP.NET Core / Web APIs
- Microservices Architecture
- Mainframe (MF) & Natural
- Redis In-Memory Caching
- Angular (v17–21)
- AI Velocity (Claude, Gemini, Codex)
- TypeScript & JavaScript
- SQL Server & Relational DBs
- End-to-End (E2E) Pipelines
- TFS / Azure DevOps & Git
- Distributed Systems
- Docker & Containerization
- Agile Methodology & CI/CD
- Postman & System Testing

Languages

Hebrew	Native
English	Fluent

Experience

Senior Backend & Full Stack Engineer, Israel Tax Authority (Sha'am) — 2025 – Present

- **E2E Service Architecture:** Architected and deployed enterprise microservices and high-throughput RESTful Web APIs using C#, .NET 8–10, and ASP.NET Core under national-scale workloads.
- **Mainframe (MF) & Data Pipelines:** Authored and optimized core Mainframe (MF / Natural) programs and routines to extract, process, and stream mission-critical data end-to-end directly into modern .NET services and Angular client apps.
- **Distributed Caching & Latency:** Engineered Redis in-memory caching layers and optimized database queries, eliminating processing bottlenecks and slashing latency for national transactions.
- **Modern Reactive Frontend:** Developed intuitive client portals and administrative dashboards using Angular (v17–21) and TypeScript, integrating directly with backend microservices.
- **AI-Augmented Engineering & Quality:** Accelerated delivery speed and automated code verification by leveraging modern AI paradigms (Gemini, Claude, Codex) alongside TFS/Git CI/CD and strict peer reviews.

Backend Developer, Qualish Ltd, Omer — 2021 Dec – 2025 Jan

- **Backend Systems:** Architected Web APIs, database schemas, and microservice endpoints in C# .NET Core 6.
- **Integrations:** Integrated multi-provider payment gateways, billing reconciliation, and real-time event notifications.
- **Data Visualization:** Built financial KPI dashboards and data pipelines delivering actionable insights for executive stakeholders.
- **Performance:** Streamlined customer onboarding workflows, cutting query latency and improving UX.

Education & Professional Training

B.Sc. in Software Engineering — SCE College of Engineering, Be'er-Sheva — 2020 – 2023
GPA: **86.7** | Specialization in **Cyber Security** | Graduation Project: Anti-cheating exam management system (C#, Web API).

Automating Success & AI Certification — INT College — 2026
Advanced AI workflows, Prompt Engineering & Autonomous Agent architectures.

Advanced Angular 17–21 & .NET 8–10 Masterclasses — John Bryce — 2025

Networking & Cyber Security Certification — Net4U College — 2019 – 2020

Military Service & Leadership

Fighter & Commander — IDF Paratroopers Brigade (Rank: First Sergeant) — 2012 – 2015
Led combat troops in high-pressure operational environments, demanding rapid critical decision-making and resilience.

Youth Leadership Mentor — "Aharai!" (Impact Scholarships) — 2020 – 2023
Mentored youth from socio-economic periphery to foster civic involvement and leadership.
